

WHO ARE WE?

We are global leaders in the Data-Centric Security space. Right from protecting nuclear submarine designs to new drug formulations to customer data of Fortune 100 organizations - we guard every kind of confidential information.

HOW DO WE DO IT?

Seclore's patent-pending, award-winning technology allows users to control how their information is used - even after it is shared with people within or outside the enterprise. This requires stretching the technology boundaries beyond what might seem possible.

At Seclore, you get to be part of the front lines - defending today's data against tomorrow's threats.

THE ROLE

Trainee Product Engineer

Location: Mumbai

At Seclore, we are all Entrepreneurs, not employees. Ours is a tribe of risk-takers, innovators, fearless problem solvers...

We are a passionate team with diverse backgrounds and experiences all driven to solve complex business problems with simple, intuitive solutions. We appreciate people who are fuelled by Passion, curiosity, hunger to learn & grow.

This position is for individuals who possess the ability to identify multiple solutions to the same problem and can help in decision making while working in a super-agile environment. Seclore is a place where innovation is nurtured. We continuously push the boundaries of innovation and find new ways to add value to customers and stakeholders. We are proud to be recognized as "Great Place to Work" for the fourth consecutive years in a row.

RESPONSIBILITIES

- You will be part of the core product development team that is responsible for building different components of the Seclore products.
- You will be responsible for designing, coding, reviewing, testing, bug-fixing different modules of the software product that needs to work seamlessly across different customer environments.
- We are looking for a coding enthusiast who love working with code and developing software systems.
- This is an excellent opportunity for young passionate developers to start their career on a strong platform with a world class product development experience and deep understanding into various cutting-edge technologies J2EE / Encryption / XML / LDAP/ Databases/ Internationalization etc.

CANDIDATE PROFILE

- At Seclore attitude and aptitude trumps everything else. While depth of knowledge is highly valued, we tend to be tech agnostic; what matters most is innovation and working smart.
- BE / B.Tech / MCA / PGDST qualification from reputed institutes.
